

CZECH MYCOLOGY

Publication of the Czech Scientific Society for Mycology

Volume 54

July 2002

Number 1-2

To the 70th birthday of Zdeněk Pouzar

FRANTIŠEK KOTLABA

On March 13, 2002 Dr. Zdeněk Pouzar completed in good health his 70 years of life. He was born in Říčany near Praha, Bohemia, on April 13, 1932. Detailed biographies (the first of them with bibliography) at the occasion of his sixtieth birthday were published not only in mycological (Herink, Kotlaba 1993, Kotlaba 1992a) but also in botanical journals (Kotlaba 1992b), since he occupies himself with vascular plants, too.

Several remarkable changes took place in the last ten years of the life of my friend and collaborator Zdeněk. His retirement (in mid-1995) as Head of the Mycological Department of the National Museum in Praha (where he worked for 21 years, from 1974 to 1995) and as President of the Czech Scientific Society for Mycology (in 2000) were the most important changes. Subsequently he was elected Honorary President of the Society and continues as Editor-in-Chief of the Society's journal *Czech Mycology* (formerly *Česká mykologie*). He worked voluntarily in committees of the Grant Agency of the Czech Republic and also of the Academy of Sciences for six years, where he helped to evaluate many mycological and botanical projects.

Of course, with Zdeněk's retirement and increasing age his activities in mycology and botany did not of course cease, it only slowed down. He often visits the Mycological Department of the Museum to work up his older as well as recent collections of mycological material, to study and identify fungi microscopically, to write labels and papers etc. He often undertakes one-day excursions to mycologically rich localities in the surroundings of Praha (Prague)

and every year one longer excursion to the Šumava Mountains (Bohemian Forest) at the Bohemian border (together with Dr. Jan Holec, who is his successor in the Museum). He continues to be occupied with fungi of various groups, such as Aphyllophorales (mainly polypores and corticia) and also Pyrenomycetes, taxonomy and nomenclature of fungi, biographies of mycologists and so on.

During the past ten years Zdeněk's mycological studies have resulted in a number of papers in English or often in Czech (with English summary). For a list of his publications, see below. Many of these studies were published jointly with other mycologists, as Zdeněk is a very cooperative man: among Czech mycologists he has probably the highest number of joint publications with other authors – and he has in these publication nearly always higher share, based on his broad and profound knowledge. For his broad knowledge and critical approach he is an appreciated reviewer of mycological manuscripts. Zdeněk's most remarkable contribution during past ten years is his authorship of several new species of fungi (many of them in cooperation with other mycologists): *Antrodia pini-cubensis* Vampola, Kotl. et Pouzar 1994, *Antrodiella beschidica* Vampola et Pouzar 1996, *Antrodiella faginea* Vampola et Pouzar 1996, *Antrodiella farinacea* Vampola et Pouzar 1996, *Antrodiella thompsoniana* Vampola et Pouzar 1996, *Dendrothele wojewodae* Pouzar 2002, *Phellinus cavicola* Kotl. et Pouzar 1994 and *Thanatephorus brevisporus* Pouzar 2002.

For his friendly nature, altruism, tolerance to the opinions of other people, an extraordinary interest to discuss problems of any kind and help to solve them, he is often consulted not only by mycologists (students, professional and amateur mycologists) but also by botanists, whom he never refuses his advice or help. He has an excellent memory and a very good knowledge of domestic and foreign mycological literature, which is admirable at his age.

All mycologists wish Zdeněk good health to be able to continue his work in mycology, and to build up knowledge in our beloved (or sometimes dammed) "*scientia amabilis*". Ad multos, multos annos!

Mycological papers by Zdeněk Pouzar since 1994

(For a complete bibliography up to 1993, see Czech Mycol. 47: 92–99, 1993)

[Addition for 1993: Kotlaba F., Pouzar Z.: Zemřel Vojtěch Benedikt (Vojtěch Benedikt died). – Čas. Nár. Muz., Řada přírod., 162: 99].

1994

Mykologické novinky (Mycological news). 1. *Suillus clintonianus* (Peck) O. Kuntze – klouzek hnědooranžový. – Mykol. Listy no. 51: 11–12.

Kotlaba F., Pouzar Z.: Rozrůstající se popelníčka aneb *Vascellum redivivum* (On going growth of the genus *Vacellum* or *Vascellum redivivum*). – Mykol. Listy no. 51: 12–13.

KOTLABA F. TO THE 70TH BIRTHDAY OF ZDENĚK POUZAR

- Kotlaba F., Pouzar Z.: Dvojité jubileum dr. Alberta Piláta (Double anniversary Dr. Albert Pilát). – Mykol. Listy no. 51: 25–26.
- Kotlaba F., Pouzar Z.: Nejjižnější lokalita *Geastrum corollinum* v Čechách a další nové lokality v České a Slovenské republice (The southernmost locality of *Geastrum corollinum* in Bohemia and other localities in the Czech and Slovak Republics). – Mykol. Listy no. 53: 20–24.
- Vampola P., Kotlaba F., Pouzar Z.: *Antrodia pini-cubensis*, a new polypore from the Caribbean area. – Czech Mycol. 47: 189–192.
- Vampola P., Pouzar Z.: *Antrodiella genistae*, a new polypore for Czech Republic and Slovak Republic. – Czech Mycol. 47: 185–188.

1995

- Kotlaba F., Pouzar Z.: *Phellinus cavicola*, a new xanthochroic setae-less polypore with coloured spores. – Czech Mycol. 48: 155–159.
- Kotlaba F., Pouzar Z.: Odešel prof. dr. Ivan Málek /Professor Ivan Málek (1909–1994) passed away/. – Mykol. Listy no. 54: 22–23.
- Kotlaba F., Pouzar Z.: Roste choroš hlinák šafránový – *Aurantioporus croceus* na Šumavě? (Does the polypore *Aurantioporus croceus* really occur in the Šumava Mountains?). – Mykol. Listy no. 56: 22–24.
- Vampola P., Kotlaba F., Pouzar Z.: Rezavec jilmový – *Inonotus ulmicola* – zajímavý dvojník rezavce šikmého – *Inonotus obliquus* (*Inonotus ulmicola* – an interesting double of *Inonotus obliquus*). – Mykol. Listy no. 55: 13–16.

1996

- Eighty years of Dr. Josef Herink. – Czech Mycol. 48: 233–236.
- Kotlaba F., Pouzar Z.: The identity of *Agaricus cyathiformis* Schaeff. – *Persoonia* 16: 233–238.
- Kotlaba F., Pouzar Z.: Zemřela paní Ludmila Staňková (Mrs. Ludmila Staňková deceased). – Mykol. Listy no. 57: 26.
- Vampola P., Pouzar Z.: *Skeletocutis alutacea* a *Skeletocutis kuehneri* – dva nové druhy chorošů pro Českou republiku (*Skeletocutis alutacea* and *Skeletocutis kuehneri* – two new members of the Czech polypore flora). – Czech Mycol. 58: 13–16.
- Vampola P., Pouzar Z.: Notes on some species of genera *Ceriporia* and *Ceriporiopsis* (Polyporaceae). – Czech Mycol. 48: 315–324.
- Vampola P., Pouzar Z.: Contribution to the knowledge of the Central European species of the genus *Antrodiella*. – Czech Mycol. 49: 21–33.

1997

- Fifty years of our journal. – Czech Mycol. 50: 1.
- Dr. František Kotlaba septuagenarian. – Czech Mycol. 59: 143–150.
- Kotlaba F., Pouzar Z.: Zemřel prof. dr. E. J. H. Corner (1906–1996) / Professor Dr. E. J. H. Corner (1906–1996) deceased/. – Mykol. Listy no. 62: 27–28.
- Kotlaba F., Pouzar Z.: Vzpomínáme ing. Jana Kuthana (1929–1997) /In remembrance of Ing. Jan Kuthan (1929–1997)/. – Mykol. Listy no. 63: 1–6.

1998

- Holec J., Pouzar Z.: New records of rare fungi in the Šumava Mountains (Czech Republic). – Čas. Nár. Muz., Řada přírod., 167: 61–72.
- Kotlaba F., Pouzar Z.: Naše ohňovce (*Phellinus*) a klíč k jejich určování (Our *Phellinus* species and key to their identification). – Mykol. Listy no. 64: 1–11.
- Kotlaba F., Pouzar Z.: Odešel profesor Karel Kult (1917–1998) / Professor Karel Kult (1917–1998) passed away/. – Mykol. Listy no. 66: 23–26.

1999

Henri Romagnesi (7. II. 1912–18. I. 1999). – Mykol. Listy no. 70: 23–24.

Kotlaba F., Pouzar Z.: The decease of Dr. Josef Herink. – Czech Mycol. 52: 93–96.

2000

Kotlaba F., Pouzar Z.: Přehlížený druh našich ložáků – *Sarcodon squamosus* (*Sarcodon squamosus* – an overlooked species of our hydnums). – Mykol. Listy no. 74: 5–7.
